

KITCHEN APPLIANCES.

Collection 25

Contents.

INTRODUCTION	03	Transform your kitchen experience with state-of-the-art appliances that seamlessly blend innovative designs, energy efficiency, and smart technology. Elevate your lifestyle as you explore ground-breaking features in every corner.
OVENS	10	There's a Caple oven for every kind of kitchen and every type of lifestyle. Choose from our smart-tech Sense Premium range, sleek and elegant SENSE range or our exceptionally versatile Classic range.
MICROWAVES + STEAM OVENS	38	Can't choose between the two? Why not opt for a combination microwave and steam oven. A must-have for a busy lifestyle.
COFFEE MACHINES	50	Combining the subtle art of the barista with the very latest in coffee machine technology. Caple gives you perfect coffee at the touch of a button.
WARMING + STORAGE DRAWERS	54	Caple's warming drawers keep tableware at just the right temperature for when the food is ready to be served. Why not add a storage drawer too? It's a convenient and stylish way to organise your coffee and wine accessories.
HOBBS	60	Whether you choose gas, electric or induction, Caple's advanced technology and unswerving eye for detail means real control and stylish good looks every time.
EXTRACTION	90	A well-engineered extractor hood does more than just help to capture odours from your kitchen. Be bold, and use it as a visual focal point too.
SPLASHBACKS	138	The perfect finishing touch.
REFRIGERATION	144	Whether you want a discreet space-saving under-counter fridge or something more spacious, you'll find it right here.
WINE CABINETS	162	Caple's wine cabinets create the optimum storage conditions for your wine; the correct temperature, humidity and air circulation. They even use low vibration technology to minimise disturbance.
DISHWASHERS	196	Happily our reliable dishwashers will give you load after load of squeaky-clean pans and glassware that sparkles like new.
LAUNDRY	202	A reliable washing machine and tumble dryer is an absolute must for any family. We've taken things further, with a range that's packed with features, good looks and performance.
PLINTH HEATERS	212	Choose from hydronic or electric models with Stainless Steel or white grills.
WASTE DISPOSAL UNITS	214	A waste disposer hidden away under the sink can help you recycle your food. It's clean, it's green and it leaves less to clutter up your bin.
INSTALLATION DRAWINGS	216	Explore a collection of installation drawings at the back of the brochure - your guide to seamless set-ups. Dive into detailed visuals to streamline your installation.

Making Functionality Fashionable.

Beautiful, functional and technologically advanced, Caple appliances are central to the concept of a contemporary kitchen. From super sleek induction hobs to discretely effective cooker hoods, whisper quiet dishwashers and smart [in every sense] wine cabinets, they cater for every lifestyle.

Chef, entertainer, home maker? Whatever your passion Caple provides the inspiration to carry it off with exceptional style. Our range offers the depth and versatility to seamlessly integrate into your kitchen, whatever its design or layout. Discover exciting new ways to cook, cool or wash, but above all, bring out the beating heart of your home.

Cooking The Way You Want.

BASE HEAT	TOP HEAT	CONVENTIONAL HEAT	FAN HEAT	FAN HEAT WITH BASE HEAT
Bottom element only Removes the need to blind bake	Top element only Gentle heat to brown the top of a dish	Top and bottom elements Cooking consistently through to the middle Best results, use one shelf only	Fan element Fast and highly efficient even cooking	The heat produced by the circular and bottom elements is evenly distributed by the fan
PERFECT FOR Pastries and cakes	PERFECT FOR Pasta or potato dishes	PERFECT FOR Baking	PERFECT FOR Juicy roasts, no pre-heat required	PERFECT FOR Perfectly cooked quiches and tarts with no blind baking

FAN HEAT WITH TOP + BASE HEAT	FAN HEAT + GRILL	TURBO CONVENTIONAL HEAT	FULL GRILL	ECO GRILL
Combining conventional heat with fan heat for intense even cooking	Fan element and full grill Heat from both rear and upper elements	Fan assisted top and bottom elements Fast and even heat distribution without transferring smells or tastes	Full width grill Even and consistent grilling	Half width grill Energy saving inner grill section only
PERFECT FOR Crusty bread and perfectly cooked pies	PERFECT FOR Finishing off a cooked dish, or melting cheese without the worry of overcooking	PERFECT FOR Light and delicate baking, such as pastry or bread	PERFECT FOR Large pieces of steak or fish	PERFECT FOR Small portions of food, such as bacon or toast

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

TURBO GRILL	TURBO ECO GRILL	TURBO BASE HEAT	FRESH PIZZA
Fan assisted full grill Even and quick browning	Fan assisted half grill Even & quick browning for smaller dishes	Fan assisted bottom element Designed for delicate and slow cooking	Utilises a 345°C setting which cooks fresh pizza in 2 minutes 45 seconds
PERFECT FOR Cooking meat whilst keeping all the juices	PERFECT FOR Potato gratin or lasagne	PERFECT FOR Slow cooked lamb, or eliminating the need for blind baking	PERFECT FOR Homemade Italian-style Pizza

ROAST	DEHYDRATE	SLOW COOK	PROVING
Fan heat The Roast function automatically raises the oven to 250°C to sear the meat then drops to your chosen temperature	Fan heat This function uses fan heat, with a pre-set temperature of 60°C with options to select 50°C and 70°C	Top & bottom element Slow cooking over a long period of time at 90°C using conventional heat	Bottom element This function uses base heat at a temperature of 30°C
PERFECT FOR Sealing in all the flavours & perfect crackling on your pork joint	PERFECT FOR Drying fruit	PERFECT FOR Casseroles and stew	PERFECT FOR Proving dough

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

Cooking The Way You Want.

SABBATH	PYROLYTIC SELF-CLEANING	WARM	WARM+
			
			
Top and bottom elements Uses conventional heat with a selectable time of up to 72 hours, and a selectable temperature of 70°C to 140°C	Works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash for easy cleaning	Bottom element A pre-set temperature of 40°C, with options to select 30°C and 50°C	Bottom element A pre-set temperature of 75°C, with option to select 100°C
PERFECT FOR Observing the Sabbath day	PERFECT FOR Taking the effort out of cleaning	PERFECT FOR Warming plates and serving dishes	PERFECT FOR Keeping food warm

MICROWAVE	MICROWAVE + FAN HEAT	MICROWAVE + TURBO GRILL	MICROWAVE + STEAM
			
			
Standard microwave cooking function	Fan heat and microwave Reduce cooking times with the addition of fan heat for even cooking	Microwave, fan and grill Quick browning, ideal for cooking meat & keeping all the juices	Microwave and steam Operate alternatively to cook your food quickly and healthily
PERFECT FOR Ideal for reheating leftovers	PERFECT FOR Fluffy jacket potatoes with a crispy skin in a quarter of the time	PERFECT FOR Cooking a whole chicken	PERFECT FOR Steam puddings

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

MICROWAVE + CONVENTIONAL HEAT	STEAM	STEAM+	GRILL + STEAM	TURBO GRILL + STEAM
				
	 			
Uses microwave with top and bottom elements	Steam Injection No transfer of flavours Retains moisture and locks in nutrients One of the healthiest cooking methods	Steam Injection To be used with certain functions to add an injection of moisture into the cooking process	Top element and grill with steam injection Both the top element and grill operate together to grill larger quantities of food Combined with steam to help preserve moisture and flavours in food	Fan assisted grill with steam injection The fan aids the distribution of heat from the grill evenly and with added steam ensures your food retains all its moisture
PERFECT FOR Speeding up baking times for bread and cakes	PERFECT FOR Cooking multiple food types on one tray	PERFECT FOR Achieving restaurant quality results	PERFECT FOR Succulent chops & steaks	PERFECT FOR Evenly cooked sausages or burgers

FAN HEAT + STEAM	DEFROST / TURBO DEFROST	AUTO SETTINGS	BOOST	DESCALE
				
				 
Fan element and steam injection Even heat distribution with the added benefit of the steam injecting moisture into the cavity	Fan This function is used to defrost food	A range of automatic settings for milk, soup, vegetables, noodles, bread, fish, meat and chicken	Rapidly heat your oven to the required temperature using all elements at full power. Ideal for when you're in a rush	Pour in the descaler into the water tank, select this function and let the machine do the rest. This is recommended every three months
PERFECT FOR Retaining the moisture in meat	PERFECT FOR Frozen desserts	PERFECT FOR Making soup from scratch	PERFECT FOR When cooking time is less than 20 minutes	PERFECT FOR Prolonging the life of your steam oven

Please note, function icons may vary slightly from Classic, Sense and Sense Premium.

Ovens.

There's a Caple oven for every kind of kitchen and every type of lifestyle. Choose from our smart-tech Sense Premium range, sleek and elegant SENSE range or our exceptionally versatile Classic range.

Let's Compare.

Classic.

If you're after affordability, then our Classic range is the perfect cost effective product. Classic comes with a range of standard and optional features, including pyrolytic cleaning.

Sense.

A step up from the Classic collection, our SENSE range features soft close doors, rotisserie racks & intuitive touch controls depending on the model you choose.

Sense Premium.

Our Sense Premium collection is our most advanced collection to date. Featuring smart technology, WiFi connectivity, 23 functions and intuitive design which can be controlled from your phone.

Sense Premium.

#WHENPREMIUMMAKESSENSE

Introducing Sense Premium cooking.

Smart technology, WiFi connectivity, 23 functions and intuitive features all controlled from your phone. Sense Premium ovens will revolutionise the way you cook forever. Designed with you in mind.

Complete the look with a coffee machine and wine cabinet designed to match the Sense Premium aesthetic to achieve show stopping results.

The CapleHome App is available to download on Android and iOS.

sp Look out for products marked with Sense Premium flags to easily identify the range.

Features + Functions.

CAPLE RECIPES + FAVOURITES

Use the CapleHome App to access the latest recipes, save your multi-stage cooking settings and add your family favourites.

MULTI-STAGE COOKING

Some dishes require multiple functions at different stages of cooking. Multi-stage cooking does this for you without the fuss.

AIR FRYER

Transform your oven into an air fryer using the optional extra AIRFRY/AIRFRY2 tray for a healthier way to cook.

PROVE

Create the perfect dough using the prove function which uses base heat at a temperature of 30°C.

WARM+

Uses base heat, with a pre-set temperature of 75°C or 100°C to keep your food warm, just incase someone is running late!

WIFI CONNECTIVITY

The Sense Premium cooking range features WiFi connectivity.

CAPLE HOME

Download the Caple Home app available on Android or iOS.

PIZZA

Create the perfect pizza in 2 minutes 45 seconds. Choose from thin & crispy or deep pan & the oven will then do the rest for you!

MEAT PROBE

Insert the probe into the meat. The meat probe icon will automatically display on the screen to set the core temperature. Once core temperature is reached the oven will turn off to ensure the meat is cooked perfectly.

DEHYDRATE

This function uses fan heat, with a pre-set temperature of 60°C with options to select 50°C and 70°C.

STEAM

The steam function temperature ranges from 40-100°C and automatically sets duration to 20 minutes. However cooking time can range from 1min to 9hrs 59 minutes.

MICROWAVE + TURBO GRILL

Uses microwave, fan and grill for quick browning. Great for cooking a whole chicken.

MICROWAVE + STEAM

Starting with the steam function the temperature increases to 100°C. The microwave and steam functions then alternate for speedy results and maximum flavour.

CAPLETOUCH+

Sense Premium cooking features CapleTouch+. Scroll through functions and save your favourite settings with ease. It takes the guess work out of cooking. All controlled by your CapleHome app.

FINAL TOUCH

See page 190 for our collection of metallic handles to add that final touch of luxury.

FUNCTIONS

FUNCTIONS

SENSE.

Choose from sultry Black Glass, subtle contemporary Gunmetal, or a modern take on traditional steel. Sense appliances have been designed to fit together effortlessly and will turn heads in any kitchen. Featuring innovative touch control technology, every Sense oven delivers outstanding results, whatever the cooking task.

S Look out for products marked with Sense flags to easily identify the range.

COMPLETELY SEAMLESS
Complete your kitchen's sleek look with shelf end covers. Seamlessly blend cabinets and appliances to create a professional and cohesive finish by adding this final detail.

SHELF COV/BK
SHELF COV/SS

MotionHeat+ technology utilises specially designed vents and fan heat to evenly distribute hot air around the oven cavity. It reaches the desired temperature rapidly with no need to preheat, saving time and energy. Perfect for multi-level cooking without the transfer of flavours, achieving even results every time.

PRECISION CONTROL AT YOUR FINGERTIPS

Our SENSE range features fully-programmable touch controls for precise and accurate cooking temperatures and times. Although, if you prefer the tactile feel of fixed dials, opt for the C2362 with solid metal controls.

TELESCOPIC RUNNERS

All SENSE ovens come with two full extension telescopic runners making it easier to check food as it cooks and reducing the risk of burning yourself on the oven interior.

ROTISSERIE

If you like perfect joints, opt for a SENSE oven that features a rotisserie rack, great for cooking succulent roasts.

PYROLYTIC OVENS

Pyrolytic technology works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash. It saves you vast amounts of elbow grease, and can in-fact improve oven efficiency over time.

SOFT CLOSE

Opt for a model with a clever soft close door which activates when the door is inches away from the closed position. The hinge gently moves the door into place, preventing it from coming to an abrupt close.

FUNCTIONS

CLASSIC.

Our high-performance Classic range comes with a host of standard and optional features, designed to make cooking even more satisfying.

These ovens are classically designed, as the name suggests, in Stainless Steel and sheer Black Glass. Including features such as touch control timers, cool-touch doors plus a pyrolytic self-cleaning model.

C Look out for products marked with Classic flags to easily identify the range.

PERFECT HARMONY

The Classic range has been designed to seamlessly fit together to create a premium look. Whether you prefer a clean linear design or a practical stacked style, each model works perfectly together [see p.58 - 59].

TOUCH CONTROL OR SOLID METAL DIALS

You can preset cooking start and stop times with ease of use and precise control at your fingertips.

MotionHeat+ technology utilises specially designed vents and fan heat to evenly distribute hot air around the oven cavity. It reaches the desired temperature rapidly with no need to preheat, saving time & energy. Perfect for multi-level cooking without the transfer of flavours achieving even results every time.

LARGE VIEWING WINDOW WITH A LARGE CAPACITY TO MATCH

For more efficient cooking you can keep an eye on exactly what you're cooking without having to open the door and lose heat. Some single ovens also have a capacity as large as 67 litres, perfect for a hungriest of households.

FEATURES

PYROLYTIC CLEANING

The Pyrolytic technology works by heating the oven to 475°C, causing even hidden & baked-on grime to carbonise into a fine ash. It saves you vast amounts of elbow grease, & actually improves oven efficiency over time too.

ELECTRONIC THERMOSTAT

For precise temperature control.

TELESCOPIC RUNNERS

The C2239 oven comes with two full extension telescopic runners making it easier to check food as it cooks and reducing the risk of burning yourself on the oven interior.

FEATURES

SIDE OPENING DOOR

The side opening door allows for easy access inside the oven cavity without having to manoeuvre around the door. This means you can get closer to the oven which is handy when cleaning.

Double Ovens.

When mass catering is on the cards, Caple comes up trumps. Our Sense and Classic ranges offer the capacity and the functions you need to satisfy the largest appetites.

Look out for products marked with Sense and Classic flags to easily identify the ranges.

Features + Functions

CAPLETOUCH+

The Sense Premium cooking range features CapleTouch+ display. Saving your family favourites, setting multi-stage cooking timers, it couldn't be easier with the intuitive interface.

STEAM +

Set the oven to inject steam at specified intervals into the oven cavity during cooking to achieve restaurant quality results in your home.

IOS

ANDROID

Scan the QR Codes to access the 'How to guides' videos.'

FEATURES

WIFI CONNECTIVITY
The Sense Premium cooking range features WiFi connectivity.

CAPLE HOME
Download the Caple Home app available on Android or iOS.

MULTI-STAGE COOKING
Some dishes require multiple functions at different stages of cooking. Multi-stage cooking does this for you without the fuss then allows you to save the setting to your favourites to ensure perfect results every time.

FAVOURITES
Save your family favourites, multi-stage cooking settings, it couldn't be easier with the intuitive interface.

FUNCTIONS

Combination Steam Cooking.

Steam cooking is especially well suited to cooking foods like seafood, bread, vegetables, pasta and rice - the sky's the limit.

Utilising the combined functions of a steam oven - fan, steam, and grill - you can be sure to beautifully capture flavour at every turn. From delicate fish and perfectly baked bread to cooking succulent joints of meat with fan and steam to lock in moisture, combination cooking has never been so easy.

TOUCH CONTROLS + LCD DISPLAY

The intuitive full touch control panel lets you swiftly access all functions, as well as the programmable electronic timer and electronic clock. You can also view the current cooking time and the actual temperature in the cavity.

DELICIOUS DESSERTS

Combining fan heat [dry heat] with steam [moisture] is the optimum environment for making perfect light pastry or cakes.

ODOURLESS COOKING

There are no food odours with steam. This means you can prepare different parts of a meal together, without the flavours mingling. You can save energy too by cooking your meat and vegetables together.

LARGE VIEWING WINDOW

From the display panel select the light function to check what is cooking without steam escaping the cavity.

FEATURES

EASY CLEAN STAINLESS STEEL INTERIOR

The beautiful Stainless Steel interior means the cavity can simply be wiped clean after every use.

EASILY ACCESSIBLE WATER TANK

The water tank is conveniently located within the control panel and automatically open at the touch of a button.

FUNCTIONS

Meals in Minutes.

Minimalist design to complement any kitchen, yet big on handy features.

Depending on your cooking requirements, you can choose a microwave for its traditional uses such as warming up leftovers or defrosting food quickly. Alternatively, why not opt for a combination microwave? As well as cooking meals quickly, you can also use it as a normal oven and grill providing extra space when you are entertaining.

SENSE MICROWAVES

If you are in need of a traditional microwave to heat up your leftovers, then one of the built-in microwaves is the perfect choice. Or, if you are looking for an extension of your oven, opt for a combination microwave with a fan oven and powerful grill.

TURNTABLE FREE DESIGN

Caple microwaves have been designed to look the part. Some models have 40L capacity, removable dishwasher-friendly glass base and a turntable free design. This means you can fit large dishes into the cavity.

CLASSIC MICROWAVES

Want to create a seamless built-in look? The Classic range allows you to neatly arrange the bank of appliances in a linear or stacked formation so you can match your oven and microwave perfectly.

Look out for products marked with a Sense or Classic flag to easily identify the ranges.

Coffee Machines.

Combining the subtle art of the barista with the very latest in coffee machine technology. Caple gives you perfect coffee at the touch of a button.

The Secret to Great Coffee.

Fantastic coffee depends on many factors. The beans you use, the way they’re ground, even what temperature it is and how it is frothed. Plus, of course, finding a coffee machine that’s really up to the job.

BARISTA STYLE COFFEE

If you like milk with your coffee, you’ll also need to polish up your frothing skills. The texture depends on how the air enters the milk as you steam. You need a smooth, consistent texture where the foam and milk intertwine. Look out for blobs of froth on top, and don’t boil it. If the jug’s base is too hot to touch, it means the milk’s probably reached the right temperature.

For barista style lattes, cappuccinos and flat whites at the touch of a button.

MAKING A PERFECT ESPRESSO

What you’re aiming for is a pour that starts out darkly coloured then turns into shades of caramel moving slowly, like honey. Caple coffee machines makes it effortless every time.

- Gunmetal and Black Glass
- Stainless Steel and Black Glass

FEATURES

- Fully automatic
- Full touch control with white LCD display
- Settings can be adjusted for making various hot drinks such as short espresso, long espresso, normal coffee, long coffee, warm milk, warm water or cappuccino [Milk/coffee mix can be customised]
- Coffee bean grinder
- Coffee grinder adjustment to modify how fine the coffee beans are ground [13 settings]
- Uses fresh coffee beans or pre-ground coffee
- 5 Drink volume adjustments to modify the amount of coffee dispensed [Espresso, small, medium, large, mug]. Each size can be adjusted to fit your favourite cup.

- 30 Auto programmes
- Programme machine to switch-on and warm up at set time
- Makes 2 cups at a time
- Milk jug
- Steam nozzle to heat and froth milk
- Hot water function
- 3 temperature settings
- 5 Coffee strength settings [Extra-strong, strong, medium, light, extra-light]
- 1.8 Litre water tank
- 200g coffee bean capacity
- 15 bar steam pressure
- Drip tray, to collect spillages
- Used coffee ground bin
- Stand-by energy saving
- Water hardness setting
- Cleaning warning
- Descale programme

ACCESSORIES

- Coffee spoon
- Descaling agent bottle
- Milk jug
- Hot water nozzle

OPTIONAL EXTRAS

- 1 Liquid descaler [DESCALER]
Visit caple.co.uk for full range

INSTALLATION

- Rated load 1.35kW
- Fuse rating 10A

FEATURES

CAPPUCCINO, JUST THE WAY YOU LIKE IT

Using the milk dispenser you can make your perfect flat white, latte or cappuccino. For ease of use the coffee machine is set to deliver a standard cappuccino, although if you prefer more or less coffee you can adjust either to suit your preference.

SEAMLESS INTEGRATION

Our coffee machines have been designed to work with Sense or Sense Premium range, so you can create your perfect combination.

COMPLETE CONTROL

Produce your ideal beverage with ease by adjusting the settings to your preference. You can control everything from the size and strength to the fineness of your coffee grind. Perfection every time.

Warming + Storage Drawers.

There's nothing more disappointing than a hot meal served on a cool plate. Caple's warming drawers keep tableware at just the right temperature for when the food is ready to be served.

Why not add a storage drawer too? It's a convenient and stylish way to organise your coffee and wine accessories.

Recommended Combinations.

All our compact appliances are designed to work with a matching oven. So when thinking about your kitchen design it is important to find the right combination for your needs.

Whether you prefer a clean linear design or a practical stacked style, each model works perfectly together. Choose from our Sense Premium, Sense or Classic range for a style to suit you.

INSTALLATION TIP:

We recommend that when installing a stack or quad of products, a pair of our installation brackets [OVEN/BRACKETS2] are purchased to support the upper product ensuring a seamless fit.

Hobs.

Whether you choose gas, electric or induction, Caple's advanced technology and unswerving eye for detail means real control and stylish good looks every time.

Choosing the Right Hob.

INDUCTION

Uses leading-edge technology by creating a magnetic field between the hob and pan. They're quick, easy to use and energy efficient, vastly becoming a popular choice for professional chefs. [Find out more on p.64].

GAS

Heat is instant and the control is intuitive. You can choose either Stainless Steel or glass finishes. [Find out more on p.74].

ELECTRIC

The smooth glass finish of a electric ceramic hob makes cleaning easier. They're sleek and look very contemporary, making them ideal for more modern kitchens. [Find out more on p.71].

MIX + MATCH MODULAR HOBS

Any number of modules can be mixed together in any sequence. In fact, the options are almost endless. [Find out more on p.83].

Induction Hobs.

They're hygienic, more energy-efficient, safer and easy to use.

They work by creating a magnetic field between the hob and the pan. Heat is instant, and it's easy to control. Once you remove the pan, they cool down very quickly, which is handy if kids are about. They're more energy-efficient because they only heat the pan area itself, rather than all around it. In fact, they use around 25% less energy than some hobs.

MEMORY RECALL

After switching the hob off, it is possible to recall the last used settings with a couple of simple button presses.

AUTOMATIC PAN DETECTION

This feature detects when a suitable pan has been placed on a cooking zone, helping to eliminate the possibility of the hob being activated by a non-suitable object.

BOOSTER AND BOOSTER+

Saves time by increasing power for a quicker boiling time. Booster+ provides even further power and performance.

PAUSE FUNCTION

Temporarily stop all the active zones, then restart them with the same settings you paused it on.

BRIDGE FUNCTION

Want complete flexibility when cooking? Why not try an induction hob that can bridge two zones. If you cook regularly using oversized pans, these hobs will handle them with ease.

ANTI-OVERFLOW, BOIL CONTROL + ANTI-OVERHEAT

Anti-overflow automatically cuts-off the cooking zone if liquid boils over onto the control panel. Luckily boil control maintains a temperature of 94°C, just below boiling, whilst anti-overheat prevents the hob from overheating and damaging the elements, preserving the lifetime of your appliance.

INDUCTION HOB

FEATURES

PAN MOVE FUNCTION

Allows you to move the pan from one zone to another and it will automatically pick up the selected settings from the zone the pan has been moved from [power level and timer].

CHEF MODE

The chef mode creates three large zones, allowing you to cook with multiple pans at various temperatures all at the same time. For example, you can fry with intense heat then slide the pan over to a low temperature zone to keep it warm whilst you concentrate on other dishes.

IGRIDDLE3

Griddle with ease using the iGRIDDLE3. Designed for use with all Caple induction hobs, it also gives excellent results when used with bridgeable hob zones for perfectly even cooking. Ideal for veggies, meats, and more - cleanup is a breeze, just pop it in the dishwasher.

PLEASE NOTE: The C841i induction hob achieves a 13A connection by restricting the maximum load to 3kW, this is done by cleverly limiting the combined zones to a maximum power level sum of 12. For example if you had boiling water on power level 6 on one zone you could cook rice on power level 4 and gently warm food on level 2 on a third zone.

The Power of Electric Hobs.

Caple’s electric ceramic hobs are engineered with performance, versatility and ease of use in mind.

Each hob has four separate zones offering different sizes, with individual lights that glow when activated. Touch control models set seamlessly into the worktop, but if you prefer more traditional operation opt for one of the dial control models.

The smooth Black Glass makes cleaning easy and thanks to minimalist styling our frameless ceramic models will fit into any type of kitchen.

Gas-on-Glass Hobs.

If you’re looking for a hob that combines contemporary design with power and functionality, this one ticks all the boxes.

That elegant glass surface doesn’t just look stunning, it makes your hob simple to clean, while linked cast iron pan supports let you easily transfer pans across burners or away from the heat. All burners are Flame Safe, so if a flame is extinguished for any reason, the gas supply is cut straight away. Some hobs also feature a responsive triple ring burner for extra powerful cooking.

Designed with efficiency in mind, DirectHeat+ forces the heat directly towards the base of the pan via 45° inclined flame. More heat hits the base of the pan rather than escaping around the sides, therefore decreasing boiling time and bringing food to temperature more rapidly.

TOUCH PRECISION CONTROLS

Touch controls set into Black tempered glass look fabulous, but beauty is more than skin deep. Advanced digital technology gives you nine precise power levels on each burner, so they also offer an exceptional level of control.

GUNMETAL COLLECTION

At Caple, we know how important it is to co-ordinate colours in the kitchen, which is why the Gunmetal trend continues with our gas hobs. The sleek Black Glass and cool Gunmetal control work together in perfect harmony.

Low Profile Gas Hobs.

Those who’ve cooked on gas rarely go back to any other hob. Gas rings provide immediate heat, and are intuitive, reliable, and super-easy to control.

Our gas hobs come in sleek Stainless Steel or smooth finishes, and look fantastic in contemporary or classic kitchens.

Unrivalled performance and looks, coupled with ease of fitting. Caple low profile hobs are designed to sit on top of the work surface with the smallest of edges.

They give you the appearance of a professional kitchen with added Caple refinement.

FEATURES

GUNMETAL COLLECTION

Our Gunmetal range includes both appliances, sinks & taps so you can create a cohesive and contemporary aesthetic in your kitchen.

Induction Downdraft Extractors.

SEAMLESS INTEGRATION
+ UNMISTAKABLE STYLING.

As the name suggests induction downdrafts combine intuitive induction hobs with the added benefit of integrated, powerful downdraft extraction.

SPACE SAVING INSTALLATION

Unique space-saving installation can be used with minimal ducting and the motor located behind the plinth which means you can still utilise the cabinets directly underneath the hob. For installation see p.224 - 226.

PLASMA TECHNOLOGY

With cutting-edge technology, our new advanced filter not only rids away odours with plasma but also tackles fine dust and contaminants. For more information, turn to page 94.

IGRIDDLE3

Griddle veggies, meats, and more, with the induction-friendly iGRIDDLE3. It works seamlessly with bridgeable hob zones for even cooking, and cleanup's a breeze too—just pop it in the dishwasher!

FEATURES

INTEGRATED MOTOR

The integrated motor situated below the induction hob provides an easy installation solution. You also have the option to recirculate the air using charcoal filter or duct to the outside world.

MULTI ZONE INDUCTION HOB

These hobs provide complete flexibility allowing either the use of individual zones or the ability to combine them to create larger cooking areas.

If you cook regularly using oversized pans such as fish kettles, these hobs will handle them with ease.

Extraction.

A well-engineered extractor hood does more than just help to capture odours from your kitchen. Be bold, and use it as a visual focal point too.

Choosing the Perfect Hood.

We’ve designed one for every kind of kitchen. Striking colours, exceptional finishes, and plenty of functionality.

Extractors and hoods are designed to remove cooking odours, moisture and grease from the cooking environment. The extractor continually removes and filters the air when on. It then, either, returns the filtered air back in to the room or expels it through and external vent. The greater the extraction rate the more effectively this is done.

GETTING THE BEST FROM YOUR HOOD.

Try switching on the extractor or hood 15 minutes before you begin cooking. This creates kinetic air circulation within the kitchen carrying the air out more effectively. It is also advisable to keep it running for a further 15 minutes after you have finished cooking.

You can sit down and enjoy the results of your culinary skills whilst your Caple extractor or hood gets on with its job.

Once you have chosen your extractor, it is important to pair it with the correct venting. It is essential the stated ducting diameter is used, we also recommend rigid ducting to ensure you get the maximum performance. Not only will this prolong the life of your extractor, it will also improve efficiency.

If you choose to vent your extractor to the outside world, look out for the venting symbol shown to assist you in choosing the correct product. Please see p.136 - 137. for more information.

INDUCTION DOWNDRAFTS

This award-winning category of extraction is ideal for open plan living. The powerful extraction eradicates cooking odours from the room and the minimal aesthetics discreetly blends into the worktop for a seamless look. See our range of Induction downdraft hobs in the hob section, p.85.

CEILING HOODS

They’re unobtrusive and they save you space too. You can choose different motors and have complete control over extraction rates.

DOWNDRAFT EXTRACTORS

This type of counter extractor is installed behind or alongside your hob. When you need it, just press the button and it glides up in to position.

ISLAND HOODS

Better suited to larger kitchens. You can suspend them over a central island unit to make a stunning focal point.

WALL CHIMNEY HOODS

Available in all kinds of sizes, styles and finishes. Great for a dramatic focal point.

INTEGRATED HOODS

Discretely hidden behind kitchen furniture, and pulled out when needed.

BUILT-UNDER HOODS

Ideal for smaller kitchens. They’re cleverly integrated into the underside of kitchen units.

CONVENTIONAL HOODS

This type fits neatly beneath a kitchen unit, with controls usually found on the front.

Plasma

This compact powerhouse not only rids odours with plasma but also tackles fine dust and contaminants using cutting-edge electrostatic discharge [ESD] technology all combined in one filter, making it one of a kind and worldwide patented.

An important advantage of a recirculation filter is that you save a significant amount of money on your heating costs, because the filter keeps the heated or cooled air inside.

With correct use and regular cleaning of the grease filter of the extractor hood, the filter will last up to 15 years practically maintenance free

The PlasmaMade® E-Filter has specially been developed to prevent energy wastage in your home. Our filter is 97% recyclable.

Easy plug and play installation. Simply attach the PlasmaMade® Filter to the hood and insert the plug.

WHY CHOOSE CAPLE PLASMA?

Most kitchens use outdoor extraction or carbon filters to remove cooking odours. These are solutions that can be costly and unsustainable in the long term. The PlasmaMade® E-Filter is a revolutionary plasma filter with E-technology that offers a solution to these problems. The table on the next page shows a comparison between a PlasmaMade® E-Filter, regular recirculation filters and outdoor extraction.

PLASMAMADE E-FILTER	GENERAL RECIRCULATION FILTER	OUTDOOR EXHAUST VENT
Filters fine dust	Does not filter fine dust	Blows fine dust outside
Easy installation	Easy installation	Costly and complicated installation
Active filter technique, lasts 10 to 15 years	Passive filters, lasts 1/2 to 1 year	Air duct is difficult to clean
A filter for almost every extraction unit	Available for most extraction units	Fits on nearly every extractor hood
Cheaper in the long term	Costly through recurring replacement of filters	No recurring costs
Has a noise-reducing effect on the extractor hood	Increases the sound due to the high counterpressure of the compact carbon	Complex air ducts can cause high counter- pressure and noise
Very low power consumption [8 Watt]	Increases power consumption due to the high resistance or higher energy consumption	
Fully recyclable through the PlasmaMade® return system	Not recyclable	

PLASMA COMPATIBILITY

To see whether the PlasmaMade filter is available as an optional extra for your chosen extractor, look out for the logo.

PLASMA EXPLAINED

Scan the QR code for more information and how to make the most of your Caple products.

THE TECHNOLOGY BEHIND PURE AIR.

The patented PlasmaMade® filtering technology uses four individual techniques, which include the combination of Plasma and ESD to break down unpleasant smells and substances, recirculating clean and fresh air back into the room.

POLLUTED AIR.

ONE.

ONE.

The PlasmaMade® generator creates plasma by using a high voltage, this plasma neutralises odours and micro-organisms.

TWO.

TWO.

Contaminations are caught in the electrostatically charged Nano fiberglass filter, which together with the conical inner design helps to ensure smooth air flow through the filter.

THREE.

THREE.

The electrostatic discharge [ESD] filter uses a voltage of 1-4kV to break down contaminants [including grease, fine dust, pollen and bacteria].

FOUR.

FOUR.

The ceramic foam filter then helps to ensure everything gets caught, so only clean air is released back into the room, while also providing a sound dampening effect.

CLEAN AIR.

PLASMA FILTERS

PRODUCT CODE
GUC1212

- FEATURES**
- Plasma filter with ESD
 - Helps to filter against, cooking odours, airborne viruses, bacteria, fungi, cigarette smoke, VOCs, pollen, fine dust and pet allergens
 - For use in recirculation mode
 - 150 Inlet diameter
 - For use with wall/island hoods
 - Max. Extraction 600m3/h
 - Fully recyclable through the PlasmaMade return system
 - Power consumption 6w/h
 - 10/15 year lifespan
 - Easy assembly
 - Can be retrofitted
 - Offset adaptor included
 - Does NOT require the charcoal filter to be changed
 - 2 year warranty [5 years after registering]
 - UK plug included

Downdraft Extractors.

Caple downdraft extractors are the epitome of intelligent thinking in kitchen design. With an ingenious under-counter installation, wall space is kept clear and when integrated into an island unit, views across the kitchen remain uncluttered.

A downdraft extractor can be housed either behind or alongside a hob, in an island unit or within a base against a wall.

FLUSH FITTING

Fitting elegantly into the surface until activated, it rises out of the worktop beyond the height of the pans to extract odours directly from the cooking area.

These smart extractors deliver high extraction rates and give you a choice of motors and motor positioning options to suit your kitchen design. For example, your motor could be situated under the floor, on an external wall or in a cupboard, so noise can be virtually eliminated. With real versatility, our downdraft extractors can expel air via ducting or recirculate it using charcoal filters.

MOTOR CHOICES

Downdraft extractors will need to be purchased with a motor. For the full range please see p.108 - 109.

INVISIBLE MOTOR

The DDMEXT28 is designed to be easily and discreetly installed behind the plinth without the requirement of ducting to the outside of the building. For more details see p.108.

Ceiling Hoods.

Every Caple ceiling extractor uses our perimetric extraction system, which draws air in through narrow apertures around the full perimeter of the pan. It means higher air pressure, greater efficiency and less noise.

CREATING THE RIGHT ATMOSPHERE

You can also select just the right kind of lighting you want for your kitchen - from bright white to a soft, cosy, glow.

CONTROL AT YOUR FINGERTIPS

Our user-friendly remote control places power and lighting functions within easy reach. It also allows you to set the handy timer function, which automatically switches off the extractor after 10 minutes. When you leave your kitchen you know that any odours will be gone by the time you return.

CENTRE STAGE

We love the challenge of making functionality look stunning. Our hoods represent the epitome of contemporary design and technology. Perfectly complementing any other Caple product, our ceiling hoods provide performance and styling like no other. LED strip lighting, white glass finish and intelligent features ensure it has a place not only as a talking point in your kitchen, but an invaluable and practical addition.

CHOICES

Some models have unique built-in motors, others will need to be purchased with a motor. To get the right power for you see our full range of motors on p.108 - 109.

CEILING HOOD

FEATURES

STRIKING PYRAMID DESIGN

Crafted with precision, the face of the PYR600 boasts a unique pyramid design, meticulously handmade in ceramic for a touch of elegance.

FLEXIBLE INSTALLATION OPTIONS

Adapt to your space with ease - the PYR600 can be installed with or without the flue section. Take advantage of the innovative feature allowing the hood to be extracted from either the top or rear for added convenience.

CUSTOMISABLE ILLUMINATION

Experience versatility with the dimmable and colour-changing LED light, allowing you to set the perfect ambience for any occasion.

Zella

The unique Black or Gunmetal aluminium wings frame a beautifully smooth sheet of sleek Black Glass. The minimal styling and touch control are perfect for creating an ultra-modern look.

VENTING CHOICES

Ensure you purchase the correct venting for your Caple extractor. For the full range please see p.136 - 137.

Venting.

To ensure you get the most out of your extraction we have the perfect venting solution to suit your needs.

CHOOSING THE RIGHT VENTING

To ensure you have the correct venting for your chosen hood, please refer to the hood specification where the required diameter kit is listed.

EXTERNAL MOTORS

Due to the power and fitment of Caple external motors [DDMEXT11, DDMEXT21, DDMEXT25, DDMEXT28, DDMEXT31 and DDMEXT40, see p.108 - 109] you must use rigid ducting.

VENTING GRILLE
[CODE CVGS]

Worktop aluminium vent

COOLING VENTING

When installing integrated refrigeration it is important to use the correct venting.

High Efficiency Venting.

Due to the profile of a duct bend, air travelling through it can become turbulent causing increased resistance and noise. As a consequence the cooker hood will need to work harder in order to meet the required airflow rates, therefore consuming more energy. This high efficiency 90° bend has been designed to allow a uniform flow of air through the section of ducting, reducing the resistance by up to 60% and lowering the air speed. All of which results in a quieter and more efficient system.

- Smoothly channels air through the duct bend in a uniform flow
- Reduced duct resistance by up to 60% to lower the systems pressure drop and overall energy usage
- Reduced air speed through the bend to reduce noise
- Performance has been tested by the Building Research Establishment [BRE]

The diagram illustrates the improvement of air flow when using C550GL or C950GL ducting:

Typical airflow through a standard bend

Typical airflow through a high efficiency
90° horizontal bend

125MM ELBOW BEND
[CODE C550GL]

- Suitable for 125mm flat channel ducting [204 x 60mm]
Can be used with C227W and 515W

150MM ELBOW BEND
[CODE C950GL]

- Suitable for 150mm flat channel ducting [220 x 90mm] Can be used with C2653WGL, C2655WGL and 915W

150MM VENTING KIT
[CODE C2653WGL]

- For hoods with extraction over 500m³/h
- 3m venting kit

150MM VENTING KIT
[CODE C2655WGL]

- Suitable for use with downdraft hoods
- 3m rigid venting kit

STAINLESS STEEL

Cooling.

FREESTANDING REFRIGERATION	147
INTEGRATED REFRIGERATION	152
WINE CABINETS	164

Refrigeration.

Chill it, freeze it, love it.

Whether you want a discreet space-saving under-counter fridge or something more spacious, you'll find it right here.

Whatever you want, that's cool.

We've one for every kind of kitchen, big or small. Different colours, different finishes, different sizes and plenty of functionality.

FRENCH DOOR

This large, freestanding fridge freezer has two doors on the top for the fridge and drawers or doors underneath for the freezer, great for storing large items.

70/30 FREESTANDING

This is the perfect option when space is key. This stacked refrigeration solution allows you to keep that extra floor space with the impressive styling of freestanding refrigeration.

INTEGRATED

Our fridge freezer combinations or compact under-counter and in-column products can be hidden behind furniture doors. Choose fridges and freezers in different sizes and combinations depending on the space available and where you want to put them in your kitchen.

Freestanding Refrigeration.

Discover convenience, storage, and simplicity with our freestanding fridge freezers. Ready to use without installation, they're perfect for limited spaces. Caple freestanding fridges combine spacious compartments, durable glass shelves, and well-organised freezer drawers for effortless storage.

TELESCOPIC RUNNERS

The full extension telescopic runners make it easy to quickly pack away shopping, as well as allow for effortless and smooth access to the very back of your fridge-freezer drawers.

INTERNAL LED LIGHTING + TOUCH CONTROLS

Bold, well positioned LED lighting illuminate the interior of the fridge for excellent visibility while the touch controls provide quick access to all the handy functions.

FULL ILLUMINATION

The stylish backlight takes centre stage illuminating the entire fridge from top to bottom ensuring you can see all your fridge's contents quickly and easily.

STEEL TRIMMED INTERIOR

When it comes to quality, it's the small details that can make a big difference. The steel trim adds to the premium aesthetic of our American refrigeration.

DOUBLE UP

Two freezer drawers gives you easy access to your food and with the capacity of 211L, the CAFF43 can freeze all your tasty treats until you need them.

- 230 Litre net fridge capacity

INSTALLATION

- Diagram [p.237]

* The door is supplied RH hinged, it can be reversed. Please consult a qualified installation expert to reverse door configuration.

Integrated Refrigeration.

When it comes to integrated appliances, It's what's on the inside that counts. If you are looking for clean, discreet installation our refrigeration offers just that. Seamless door-on-door fitting coupled with intuitive functionality takes our integrated refrigeration to another level of cool.

STEEL DOORS

The Stainless Steel door [SSDOOR177DOD] has been designed to work alongside selected refrigeration.

DISCREET INSTALLATION

Selected integrated models feature door-on-door installation. The fridge hinges attach directly onto the furniture door, so the fridge fixings are hidden for a discreet appearance.

DON'T FORGET YOUR VENTING GRILLE

Remember, it's important to vent your cooling products. Not only does it preserve the product's life, it also improves efficiency for day-to-day usage. Choose an integrated plinth grille for a discreet solution to venting correctly.

FEATURES

FRUIT + VEGETABLE PRESERVATION

The Caple Fresh preservation technology inside the crisper drawer, ensures that your fruit and vegetables stay fresher and tastier for longer. This innovative new system helps to eliminate the natural gases that are produced during the ripening and ageing process, preserving them for longer. Also, the Caple Fresh preserver does not need to be replaced. It can be regenerated by exposing it to sunlight for one day a year.

COOLING TRIO

Our RiF1801 & RiL1800 in-column refrigeration models have been designed to complement our WC1801 wine cabinet, so you can create a luxurious cooling trio.

Integrated Refrigeration.

FROST-FREE

No more laborious defrosting with a scraper. Our frost-free system works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer. Freezing food is also much quicker, preserving as many nutrients as possible and freeing up much needed storage space.

FULLY ADJUSTABLE SHELF

Key features in RiL1796, Ri7308 & Ri5508 fridge include a fully adjustable shelf in the door for true flexibility in your cooling appliance.

MODERN LIVING

The RiL1796 fridge and RiF1797 freezer have been designed with modern living in mind. The matching, in-column fridge and freezer are hidden behind your cabinet doors for an ultra neat finish in a contemporary or classic kitchen.

ENHANCED LIGHTING

LED strip lighting across the top and down each side of the fridge for a stylish, practical finish.

GLASS SHELVES

Some of which have a deluxe steel trims to catch any spills.

Wine Cabinets.

Caple's wine cabinets create the optimum storage conditions for your wine; the correct temperature, humidity and air circulation. They even use low vibration technology to minimise disturbance.

And of course, they look great.

Care For Your Collection.

TO STORE

All wine should be stored at 12-14°C whether red or white. Our cabinets simulate cellar conditions - dark, still, humid and a constant temperature.

TO SERVE

For rosés and whites it's 8-14°C, for sparkling wines it's 6-10°C. Full reds need 16-18°C, whereas lighter ones are best at 13-16°C. For some wine cabinets this temperature variation is a problem. However, Caple cabinets can offer multiple zones that keep all your wines at the perfect temperature for storing or better still, serving.

COMPRESSOR COOLING

When choosing a wine cabinet it's important to consider the type of cooling system it uses. Many conventional cabinets use thermo electric technology, which is only capable of cooling to 15°C below the room's ambient temperature. So on a warm day of 25°C the contents will only cool to a minimum of 10°C, leaving your wine exposed to potentially damaging temperatures.

Caple's wine cabinets use a compressor cooling system, which maintains precisely the right temperature, regardless of the ambient room temperature.

THE IMPORTANCE OF LIGHTING + STACKING

Ultraviolet light causes lightstrike, which makes wine age prematurely. So it's important to avoid exposing bottles to sunlight or fluorescent light. Our white LEDs not only look great, they are also UV-free with no heat output either.

Bottles should usually be stored on their side so the wine stays in contact with the cork. This keeps the cork moist and ensures a good air seal for the bottle, which prevents oxidation and immediate ageing.

Wine benefits best from side storage if the level of the wine reaches at least the upper shoulder of the bottle when upright. Caple's wine cabinets provide sufficient shelves to allow for bottles to be stored either on a single level for easy reach, or stacked for longer storage.

FINER WINE

Vibration and humidity during storage will influence how your wine will taste when it's finally poured. That's why Caple's wine cabinets come with anti-vibration gaskets and low vibration compressors to prevent disturbance to the wine's sediment balance. Our cabinets also create an ideal atmosphere of above 65% humidity, to preserve cork quality and prevent mould and odours. You can be confident your wine is in good hands.

Sense Premium Wine Cabinets.

TELESCOPIC SHELVES

The beech and Stainless Steel fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection. Perfect for Burgundy, Bordeaux and Champagne bottles.

AIR PURIFYING TECHNOLOGY

Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

PREMIUM FUNCTIONALITY

Four light settings and four functions means you can find the right storage environment to suit your wine.

FULLY INTEGRATED

The Wi6161 & WC1801 integrated wine cabinets are perfect for creating a seamless aesthetic. Simply make a frame for the cabinet to match your kitchen furniture to create a seamlessly discreet and truly unique, luxurious style.

Look out for products marked with Sense Premium flags to easily identify the range.

NORMAL MODE

The wine cabinet will operate with the temperatures you select.

ON/OFF

Internal light is continuously on. Three minutes after closing the door the light will dim for a more subtle look.

BRIGHTNESS

Once a light function is selected you can adjust the brightness of the internal lighting.

TIMER

This function keeps the lights on for 10 minutes once the door is closed and then switches off.

DOOR OPENING LIGHT

Internal light will switch on when the door is opened, and off when the door is closed.

INTELLIGENT MODE

The fan speed adjusts according to the ambient temperature so the cabinet doesn't have to work as hard and also saves energy.

ECO MODE

Lighting and control panel turns off and the compressor is delayed. Perfect for saving energy.

DEMO MODE

Primarily for Retail use. In this mode the compressor and heater are disabled and the fan input is reduced.

In-column Wine Cabinets.

Fully Integrated

SEAMLESSLY INTEGRATED

Simply make a frame for our WC6530 and WC6130 to match your kitchen furniture, to create a seamlessly discreet and truly unique, luxurious style, with all the premium functionality that you expect with a Caple wine cabinet.

EFFICIENT VENTILATION

Enjoy hassle-free installation with the self-ventilating feature of the WC6530 and WC6130 wine cooler, eliminating the need for a plinth grille as air is efficiently drawn beneath the appliance and expelled above the door back into the room.

LED LIGHTING

Illuminate your wine collection in style with the LED side strip lights, providing improved visibility and showcasing your beautiful assortment with elegance.

PERFORMANCE

e Energy class G
Noise level C
Energy consumption 162kWh/yr
Ambient temperature 16°C - 32°C
Temperature range upper zone 5°C - 18°C
middle zone 5°C - 10°C
lower zone 10°C - 18°C
Humidity range >65%RH
Quiet operation 38dB[A]

FINISH AVAILABLE

	Black Glass
	Stainless Steel

FEATURES

- Shelves can accommodate 750ml Bordeaux, Burgundy and Champagne bottles
- No-frost compressor cooling technology maintains a consistent temperature
- Triple stacked temperature zones, independently controlled for storage or serving
- Touch control and white LED display
- UV/heat-free white LED lighting [switchable]
- Vibration free
- Telescopic beech shelves
- Fan circulated cool air for even temperature distribution
- Reversible door
- High temperature and open door alarm
- 2 Heaters raise internal temperature when external temperature drops
- Upper zone has 2 sliding shelves and 1 display shelf
- Middle zone has 3 sliding shelves and 1 display shelf
- Lower zone has 3 sliding shelves and 1 base shelf
- Double stacked shelves

WC1792

100% CFC/HFC free

- Toughened UV protected glass door
- 3 Humidity control water tanks
- Black cabinet interior and Stainless Steel back panel
- Air ventilation through plinth grille

WC1796BG UNIQUE FEATURES

- One piece Black Glass door
- Black square handle
- Supplied with Black Steel universal plinth grille w:525mm

WC1792 UNIQUE FEATURES

- One piece Stainless Steel door
- Square Stainless Steel handle
- Supplied with Stainless Steel universal plinth grille w:525mm

CAPACITY

- Stores max. 89 Bordeaux style wine bottles 750ml [29 bottles on upper zone, 25 bottles on middle zone and 35 bottles on lower zone]
- Bottle stacking diagrams available at caple.co.uk

OPTIONAL EXTRAS

- 6 Wine labels [WINELABEL]
- Metallic handles available [see p.186 for full range]
- Furniture doors [SSDOOR177] for WC1792 cooling trio *see below

INSTALLATION

- Diagram [p.241]

Freestanding Wine Cabinets.

FLEXIBILITY

Freestanding wine cabinets offer great installation flexibility. You can either house them in units to give them the appearance of being built-in, or you can have them as a stand alone feature.

TRIPLE ZONE

The WF1552 & WF1553BG triple zones are independently controlled allowing you to keep your collection at the perfect temperature for storing and drinking.

WINE GLASS RACK

The WF1552 & WF1553BG also feature a wine glass rack. The glass rack allows you to convert some of your wine cabinet into storage for wine glasses or flutes, giving you the perfect chilled glass.

MAXIMUM STORAGE

With storage for 111 Bordeaux style bottles, the WF1552 & WF1553BG boast the largest storage capacity in our extensive collection.

Washing

DISHWASHERS	196
WASHING MACHINES	204
WASHER DRYER	208
TUMBLE DRYERS	210

Taking the Chore out of Washing.

Who says that functional objects can't look fantastic? That's why we've designed our dishwasher and laundry appliances with an eagle eye on performance and style.

Caple is renowned for ultra stylish looks, hi-tech and all-round ease of use. With fast, efficient clothes washing and drying and sparkling clean dishes, our appliances will always get the job done beautifully with minimal effort.

WASH HOWEVER YOU WISH

Our range of washing appliances gives you all the options you need to fit in with your kitchen and your budget. What's on your wish list?

An appliance that makes the most of minimal space? One that can cope with a large family?

Or super stylish looks? We tick all your boxes.

Our dishwashers are exceptionally versatile, using clever technology to deal with any type of load. Our washing machines and washer dryers make light work of all your laundry needs with features like allergy care, stain reduction and extra large doors. What's more, Caple tumble dryers can be kept neatly behind furniture doors for a flawless finish.

Dishwashers.

Ask many people to name a household item they wouldn't want to live without, and many will answer "dishwasher".

Our reliable dishwashers will give you load after load of squeaky-clean pans and glassware that sparkles like new.

Performance with Shine.

Whether it's a quick wash or something more heavy-duty, every Caple dishwasher is designed to perform well. All models are fully integrated to tuck away behind your kitchen doors.

AUTO DOOR OPEN

The door automatically opens at the end of a cycle releasing steam to improve drying.

INTERNAL LED LIGHT

Activated when the door is opened, it illuminates the inside.

REDUCE YOUR WATER + ENERGY USAGE

The Half Load function on our models is ideally suited to small loads, unlike traditional Half Load programmes [which usually only use one basket] reducing energy and water use.

DELAY TIMER

Allows you to delay the start time for between 1-24 hours.

AQUASTOP

Automatically cuts off the water at the first sign of a leak, helping to avoid costly water damage.

AUTO WASH

Auto wash on Di654 has sensors checking the level of cleanliness of the load, saving you time, energy and water.

WATER CONSUMPTION

The entire range has low water consumption figures, which is not only great for the environment but your pocket also. The Auto Wash programme on the Di482 uses an astonishingly low 9 litres of water.

ALTERNATIVE WASH

Available on a selection of models the alternative wash allows you to select either the upper or lower baskets for the load. You'll save water and energy with smaller loads.

SLIDING FURNITURE DOOR SYSTEM

The Di654's sliding door mechanism, allows a full height or reduced height plinth to be fitted without cutting.

ADJUSTABLE UPPER BASKET

Look out of for models with adjustable upper basket. You can change the height of the upper basket [even with full loads] with the simple release of two conveniently placed levers.

POWER WASH

Power Wash, exclusive to the Di654, when used with either intensive, normal, economy, glass and one hour express programmes, helps break through heavily soiled loads by increasing washing temperature and duration.

FULLY INTEGRATED SLIDING DOOR DISHWASHER

FEATURES

EXPRESS WASH

Save time with the Express Wash feature, reducing programme duration for selected programmes and ensuring efficient dishwashing.

SLIDING FURNITURE DOOR SYSTEM

The Di654's sliding door mechanism, allows a full height or reduced height plinth to be fitted without cutting.

INNOWASH SPRAY ARM

Experience advanced cleaning with a 360° revolving spray arm designed to effectively eliminate stubborn, baked-on food from your dishes.

WINE RACK

Safely place your wine glasses in the upper and lower racks or the freestanding holder, utilising a specialised design to secure them at the perfect angle for thorough cleaning.

Laundry.

A reliable washing machine and tumble dryer is an absolute must for any family. We've taken things further, with a range that's packed with features, good looks and performance.

Washing Machines.

Choose from a selection of integrated machines that tuck neatly away. Whichever you opt for, you can be sure it will do the job in style. All our machines use the most advanced technology to make laundry day just that bit easier.

DIGITAL DISPLAY

Included on all models. Shows the programme phase, spin speed and any extra functions selected.

15-MINUTE RAPID WASH

A super-speedy programme designed for small, everyday loads—perfect for when you're in a hurry.

BRUSHLESS MOTOR

Enjoy a quieter laundry experience. The brushless motor significantly reduces noise compared to standard motors, making every wash more peaceful.

EXTRA LARGE DOORS

Makes loading and unloading much easier.

FEATURES

15-MINUTE RAPID WASH

A super-speedy programme designed for small, everyday loads—perfect for when you’re in a hurry.

Tumble Dryer.

We want your lives to be easier. Caple’s intelligent tumble dryer makes sure you always have a pile of soft, freshly-laundered garments ready when you need them.

VENTILATION

Ensure your tumble dryer is well vented and the plinth is notched correctly. For a discreet and seamless finish, use an integrated plinth grilles to cover the aperture.

It has all the functionality of a freestanding model but with the seamless integration of a built in tumble dryer. Caple are one of the few brands to have a tumble dryer with Heat Pump Technology that can also be built in.

INTEGRATED 7KG HEAT PUMP TUMBLE DRYER

FEATURES

HEAT PUMP DRYER

Conventional tumble dryers work by releasing the hot air used to dry clothes, whereas heat pump technology conserves and reuses it. This is one of the many reasons heat pump technology has been used in Switzerland and Germany for about 13 years.

WHAT ARE THE BENEFITS?

Heat pump tumble dryers are much better for the environment and cheaper to run, with heat pump technology using almost 50% of the energy used by conventional models [C-rated]. Moreover, since it uses an energy efficient heat exchange system, the air temperature inside the drum is considerably lower than conventional dryers, which provides a better protection for clothes.

HOW DOES IT WORK?

Heat pump tumble dryers have a condenser that separates water from the warm air that passes over the wet clothes and puts it in a water tank. The remaining dry warm air is then pumped back through the drum, re-using it to help the clothes dry faster. This makes them by far the most energy efficient of all the tumble dryer types available.

Plinth Heaters.

Choose from hydronic or electric models [which are plumbed into the central heating or stand-alone, respectively] and Stainless Steel or white grills.

Look out for plinth heaters that can also blow out cool air on warm days [or when you can't stand the heat but have to stay in the kitchen!]. A neat way of warming your kitchen.

PLINTH HEATERS

PRODUCT CODE

PH500H

DIMENSIONS

Grille: 495 x 100mm
Heater: 322 x 380mm
[including pipe work]
Plinth cut out: 360 x 96mm

FUNCTIONS

- 500mm hydronic plinth heater [central heating]
- Stainless Steel grille
- 2 speed fan
- Summer setting [fan circulates air round the room]
- Up to 24% more efficient than standard radiators
- Auto switch on
- Easy install
- Low noise

CONNECTIONS

- Fuse rating: 3amp
- Voltage: 220-240 / 50hz
- Heat output: 3057 - 3979 Btu [0.9 - 1.17kW]
- Maximum working pressure: 8bar [1Mpa]

Food Waste Disposal.

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It’s clean, it’s green and it leaves less to clutter up your bin. It also reduces any decomposing food odours.

It couldn’t be easier or more convenient to use. Simply turn on the cold tap and the disposer then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means much less rubbish to take away and clog up our landfill sites. It also means a reduction in the amount of greenhouse gases emitted.

Waste from your disposer can actually be recycled into a soil conditioner once it reaches the water treatment plant, so you will be making a positive contribution to your environment.

All models carry a lifetime corrosion proof guarantee, this warranty covers against failure due to corrosion.

PREMIUM FEATURES

The lightweight and compact design of the WDU125 features easy mount installation and 1.25hp motor and grinding system with a superior torque grind speed for a long system life and maximum power.

BIO SHIELD

The Bio Shield odour protection is treated with antimicrobial agent to provide ultimate protection against the growth of bacteria and subsequent odours.

All models carry a lifetime corrosion proof guarantee, this warranty covers against failure due to corrosion.

INSTALLATION MADE EASY

Minimum cabinet depth depends on orientation, hob type and worktop material. Cabinet base may need to be cut or routed to accommodate height of unit. If positioned behind a hob, minimum cabinet width for DD522BK/606BK extractors is 600mm, and for DD903/911/901 allow 900mm. If positioned alongside a hob, the cabinet may need to be reinforced to strengthen where the base has been modified. The hood can be fitted right up to an electric hob [50mm gap required for gas hobs], but always ensure that the independent electronics box in the cupboard below is installed at least 650mm from the heat source. The hood can be ducted from both sides enabling the downdraft to be positioned behind a hob and under-counter oven.

Performance Guaranteed.

Here at Caple, performance and reliability are the most important features considered when designing and manufacturing our products. With that in mind, we have developed Caple Care, an after-care solution comprising of three tiers to give you that extra peace of mind.

FREE 2 YEAR GUARANTEE

Across all Caple appliances we offer a free 2 year guarantee on parts and labour. When selecting the components to design your perfect kitchen it is important you have the right assurance without spending an extra penny. All you need to do is visit our website or call us on 0330 123 0998 to register your free 2 year guarantee.

5 YEAR EXTENDED COVER

Why not extend your cover to 5 years? Caple Care 5 years parts and labour cover means for a one off payment or a monthly fee you can protect your appliance for a total of 5 years [including your free 2 year guarantee] on all parts and labour for any of your Caple appliances.

OUT OF GUARANTEE

If you choose not to opt for a 5 year extended warranty, don't worry. Here at Caple we offer out of guarantee cover. So, if you are not covered under our extended warranty, for a fixed fee, we can still arrange a service call [including parts and labour] or a replacement product up to 6 years after the purchase date. Terms and conditions apply.

TO REGISTER YOUR FREE 2 YEAR GUARANTEE OR DISCUSS AN EXTENDED WARRANTY, CALL

0330 123 0998 OR VISIT [CAPLE.CO.UK/REGISTER-YOUR-APPLIANCE](https://www.caple.co.uk/register-your-appliance)

Lines are open 9am - 5pm Monday to Friday [excluding bank holidays].
Calls maybe recorded and monitored for quality and training purposes.
Full Terms and Conditions can be found at www.caple.co.uk.

Issue: CA0125

Every effort has been made to reproduce colours and materials accurately, however due to the photography and print processes, colour variations may occur.

Due to our continued product development policy, we reserve the right to modify product specifications and/or dimensions without notice.

Please contact your retailer, call Caple direct on 0117 938 1900, email info@caple.co.uk, or visit our website at www.caple.co.uk for further product information.
